# OUR SERVICES

## GRAPHICS DESIGN

We believe graphic design is about more than just “being pretty” — It’s about using images, infographics, illustrations, charts, graphs and layouts to communicate ideas, and sell products or services. By utilizing graphic design and visual branding, we design brochures, catalogs and other marketing collateral to be more than just handouts; they are educational & sales tools created specifically to take your company to the next level.

We use innovative graphics mixed with intuitive and professional layouts so that the brochures and catalogs we create will turn readers into customers.

## RESPONSIVE WEB DEVELOPMENT

It is important that your website layout and content can be viewed well on all the screen resolutions. Responsive web development responds to the requirement of user by changing the layout of website according to the device it is being viewed on.

Responsive web development is the need of the hour as it changes the appearance of the website dynamically according to the screen size of the device being used.

## WEBSITE DEVELOPMENT

Global India Technologies provides turnkey Web Solutions to various kinds of businesses operating worldwide. Our Websites are unique and eye-catching which empowers our customers to represent themselves online confidently in the global arena to generate more revenue. Global India Technologies focuses on all the aspects of managing a web project involving Web Design and Development life cycle. Our technical goal is to provide a powerful Web-Based solution using n-tier architecture to our customers to face today’s emerging Internet scenario.

## DOMAIN AND HOSTING

Any of your online business needs can be managed with your own disk space online. Entire database management will be extremely easy with dedicated web space you will be having in which you can host any number of personal websites, e-commerce solutions, social medias, advertisements, portfolios etc. So, web hosting in one place means you will have your entire data in one place which can be easily downloaded, sent or shared easily. All you need is a domain and selected hosting with us and your entire website maintenance can be provided by our special teams.

## WORDPRESS DEVELOPMENT

WordPress is a one of the most user-friendly content management system (CMS) and blogging platform based on PHP and MySQL technologies. It is a web software that allows creation of beautiful websites, gallery, blogs, portals, social networks, online stores and much more. The elegant user interface, features and functionalities are some of the reasons that made WordPress incredibly popular among other content management systems.

Since it is open source, it can be easily customized and developed as per the requirements. It is considered as the most flexible platform for integration and development of websites and blogs. Due to its robust and easy architecture, templates support and custom plugins, users are provided with an ability to control their websites and blogs very easily. Below are some of the reason to choose WordPress as a CMS platform for your website and blog.

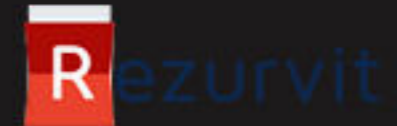

## PHP DEVELOPMENT

Our team of PHP developers has years of experience. Thus, we are very comfortable with any functionality that you may require. From simple websites to comprehensive e-commerce sites to complex online applications, we have done it all. We can create high performance web systems with great confidence. Our PHP development experience also puts us in a place where we understand your requirements faster and better. We can incorporate your ideas in your website or Internet application with greater accuracy. The approach is collaborative- we bring in ideas and suggestions, and hence adding value to your application. With a keen eye on detail, our PHP developers will create for you a platform or application that is in total sync with your business model and practices. We go a step beyond and gain a keen understanding of your customers and align your website to their needs.
